

Kincardine Trails

KIPP Trail Length: 12 km Difficulty: 2-3

Highlights: Open in November 2022, the KIPP is a 12 km ‘paved path’ between Kincardine and Inverhuron Provincial Park. The first 5 km is located north of Kincardine in the west ditch of Bruce Road 23 and then uses 7 km of existing trails, lower roads, sidewalks and pedestrian bridges to reach the southeast corner of Inverhuron Provincial Park.

Blue Trail Length: 9 km Difficulty: 2-3

Highlights: If you are visiting the Davidson Centre, take the opportunity to explore the myriad of trails that surround the complex. The Blue trail officially became connected to the Red between Russell St. and Durham St in 2014. Walk along the North Penetangore or take one of the many side trails. Or head to the North Line Extension (NLE) trail that offers a parkland trail and quiet bush scenery. At its northern terminus it also connects to the shore of Lake Huron where you can then join onto the Pink Trail. Contains some steep slopes, log steps, varied terrain and trail widths.

Green Trail Length: 6 km Difficulty: 2-3

Highlights: Has a main trunk and many side trails in the Fraser Drive Area. Three bridges have been installed, one of which won a “best practices” award from the Bruce Grey Trail Network in 2004. Go east from the permanent bridge (at Park St) and travel out to Highway 21 where you can cross a seasonal bridge and join onto the Red Trail. A quiet walk on this trail brings you close to flora and fauna. Watch for trout, beaver, geese, etc. while walking through cedar and deciduous forests. This trail is excellent for winter walking and snowshoeing. This trail has many steep slopes and log stairs making it the most challenging of the KTA system.

Pink Trail Length: 4 km Difficulty: 1-2

Highlights: This trail stretches along the water front from the south municipal boundary on Goderich St. to the Lower NLE Trail to the north. This section includes, beach, board walk, rail trail and paved path connections. It is a very scenic route when you consider that you will be enjoying numerous parks, the Pavilion, Rock Gardens, Harbour St. flag pole, the harbour, Lions and volunteer boardwalks, lighthouse, and Lovers Lane. The majority of this trail is on a wooden boardwalk and sidewalks. Due to the proximity of the beach, portions of the trail may have sand covering the trail.

Red Trail Length: 6 km Difficulty: 1-2

Highlights: Park at the flag pole at the foot of Harbour St. or at Geddes Park adjacent to the Queen St. bridge, and enjoy the sights and sounds of the Penetangore River. This trail meanders along the river, under the Queen St. Bridge, then through the Geddes Environmental Park. From here you cross a permanent bridge and follow alongside the S Penetangore River east to Hwy 21. The trail contains varied terrain with sections on sidewalks. Some bridges are seasonal, please check for trail limitations prior to use.

Yellow Trail Length: 5 km Difficulty: 1

Highlights: Connects to the Green Trail at Kincardine Ave. and to the Pink Trail at Goderich St. From the Green Trail head west on Kincardine Ave and then south on Adelaide St. Here you will traverse a bridge before crossing Bruce Ave. The trail then winds its way alongside a marsh and then – watch out for fly balls! Take the three loop trail through the forest between the cemetery and lagoons. You are now entering the best bird-watching spot in the entire area. You now come upon a former railway bed – east takes you to the Hwy 21 termination point, while the west route leads to the Pink Trail near Boiler Beach. This trail has a variety of terrain, and some sidewalks or wider trail sections with a few hilly sections.

Trail Rating Scale

- (1) Easy (2) Moderate (3) Varying Inclines
- (4) Difficult – Steep Slopes
